

# Pet ZONE

helping kids help pets

ISSUE 2

**FIND OUT HOW TO CARE  
FOR YOUR PETS, BIG  
AND SMALL**

## WHO IS CARE?

C.A.R.E.'S MISSION IS TO PREVENT ILL-TREATMENT, CRUELTY AND SUFFERING TO ALL DOMESTIC ANIMALS AND TO ELIMINATE OVER-POPULATION AND

ITS ACCOMPANYING PAIN AND SUFFERING BY ACTIVELY PROMOTING SPAYING AND NEUTERING. ALSO TO ENDEAVOR TO EDUCATE ON RESPONSIBLE PET OWNERSHIP, ANIMAL WELFARE AND ANIMAL BEHAVIOR BY ENGAGING THE HEARTS, HANDS AND MINDS OF THE COMMUNITY TO HELP THE ANIMALS.

## WHO IS

### kidsCARE?

KIDSCARE IS ABOUT HELPING YOU LEARN TO MAKE A DIFFERENCE IN YOUR COMMUNITY BY TEACHING YOU HOW TO CARE FOR ALL LIVING THINGS, BIG AND SMALL.

## WHAT IS PET ZONE?

THE KIDSCARE PROGRAM STARTED AS AN INTERACTIVE SCHOOL PRESENTATION TEACHING KIDS THE BASICS ON HOW TO CARE FOR THEIR PETS AS WELL AS EMPATHY TOWARDS ALL LIVING THINGS. PET ZONE IS ABOUT REACHING AS MANY KIDS AS POSSIBLE ACROSS THE ISLANDS TO SPREAD AWARENESS AND IMPROVE THE COMMUNITY WE LIVE IN.

## THEY LIKE TO PLAY WITH FRIENDS

The best part of your day is probably running around and playing games with your friends. Our pets are social and need time to play with their friends or their family to live a happy life.

## THEY LIKE FRESH FOOD AND WATER

No one likes an old glass of water or mouldy food. Our animals need fresh food and water every day just like we do!

## THEY GET SCARED WHEN YOU YELL AT THEM.

Do you ever get scared when someone yells at you? Or confused if someone yells at you for something you didn't even do? Animals don't like being hit or yelled at either.

## THEY LIKE A NICE PLACE TO SLEEP

Having a nice safe place to sleep is very important to us, and is just as important for your pets. If your pet lives outside they need to have a place to sleep out of the sun and rain with something soft to lay on.

Imagine never getting to play with your favourite toy or play your favourite game again! Our pets like to play games and have toys too. There are even some games you can play together, what are some you can think of?

## THEY LIKE TO PLAY WITH TOYS

# ANIMALS- THEY'RE JUST LIKE US!

## THEY LIKE COMPANIONSHIP

Whether it's the bond with a human or another animal, most pets are social and need companionship to be happy. It is sad when pets spend all day and night by themselves. They like to spend time as part of the family.

## THEY LIKE TO CUDDLE

When pets like to cuddle they really like to cuddle! Make sure you always give your pet a chance to move away if the cuddles are too much for them!

## THEY LIKE A CLEAN BATHROOM

No one likes a stinky litter box! You should pick up after your pet once a day to make sure they are living in a nice clean environment.

If you got really sick, or hurt yourself your family would take you to the doctors. Our pets need us to take them to the vet when they aren't feeling well. It is important to bring your pet to the vet once a year to get them checked out and get medication to protect them against ticks and fleas and other diseases.

## THEY GO TO THE DOCTOR

# DO YOU REMEMBER THE 5 FREEDOMS?

As humans we can ask someone for food if we are hungry, or put a sweater on if we are cold. But what about our pets? They rely on us for the things they need to survive. Each of the 5 freedoms makes us think about life from their point of view. See if you can remember what they are by playing the game below. Match the right freedom to the right description. Challenge your friends to see who can get all 5!

**FREEDOM FROM BEING UNCOMFORTABLE**

**FREEDOM FROM BEING SCARED**

I don't like sleeping in the dirt and mud. Give me a nice bed to make sure I have the freedom from....

**FREEDOM TO ACT LIKE MYSELF**

The "Five Freedoms" of Animal Welfare

Take me to the vet to make sure I have freedom from...

**FREEDOM FROM PAIN INJURY AND DISEASE**

**FREEDOM FROM HUNGER AND THIRST**

When my stomach rumbles or I spend a lot of time in the heat running around I need these things to make sure I have the freedom from...

Sometimes I run around and jump and act silly, other times I like to spend time alone. Let me do these things to make sure I have the freedom to...

Thunder and lightning sure is loud! Bring me inside during storms to make sure I have the freedom from...

**WHAT'S WRONG HERE?**

*Keeping the 5 freedoms in mind, write down what is wrong in each of the photos below and what you would do to make it better*

This kitten does not look OK! Where should his owners take him?

---

---

This poor guy is tied up and can't protect himself from the sun or rain. What should his owner do?

---

---

---

This dog has a house, but where is his food and water?

---

---

---

Does this bird have enough room to fly and move around? What should her owners change about her home?

---

---

---

Rabbit's are prey animals, meaning they get scared easily and need to have places to hide to feel safe. What should this rabbit's owner do?

---

---

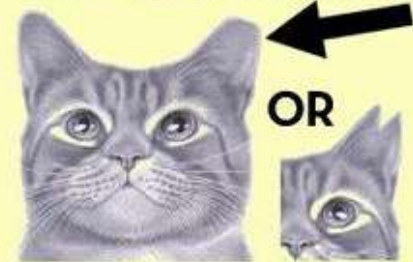

# ALL ABOUT CATS

ASK DR. JOYCE

I've seen some cats with a little clip in their ear, what does that mean and how does that happen?

That small clip shows that the cat was spayed or neutered and they can no longer have kittens. This happens by people safely catching these cats, taking them to a veterinarian for surgery, and then returning them home. This helps reduce the amount of wild and homeless cats in Cayman.

## Have you seen cats with ears like this?

These cats have been "ear-tipped" or "notched". This is a surgical alteration showing that a free-living cat has been spayed/neutered. It's part of "TNR", which means "Trap", "Neuter", "Return".

How many litters per year can a cat have?

About 2-3 litters per year is common in cats, but it is possible for them to have more. One cat can have over 100 kittens in her lifetime!

## MAKE YOUR OWN CAT TOYS!

### Puzzle Box

Find an old box and cut some holes in the top and on the sides. Place a ball, toy or treats inside the box and challenge your cat to try to get the fun out!

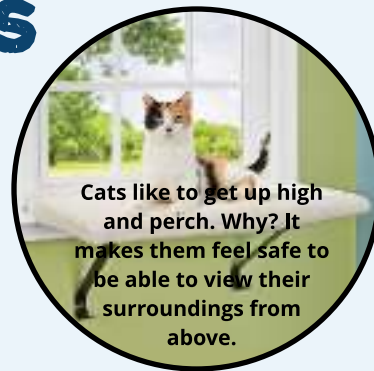

### Wand Toys

If you've got string, you will have a happy kitty! Tie a cork, feather, pipe cleaner, etc to the end for your cat to chase. Use your imagination, the possibilities are endless!

### Toilet Paper Roll Toys

Attach pipe cleaners, pom poms, string, etc to empty toilet paper rolls for hours of fun for you and your kitty. Cut them up into fun shapes to give lots of variety.

Cats like to get up high and perch. Why? It makes them feel safe to be able to view their surroundings from above.

## How Old Is Your Cat in Human Years?

4 weeks	baby
6 months	kid
1 year	teenager
2 years	mid-twenties
5 years	mid-thirties
10 years	mid-fifties
15 years	mid-seventies
18 years	mid-eighties
21 years	centenarian

Cats change as they age. Just like us. Educate yourself and help your cat age gracefully.

Did you know when a cat walks towards you with their tail up high, that is a friendly greeting? They show they want to say hello by pointing the tip of their tail towards you.

Did you know cats sleep on average about 16 hours a DAY?

## CAN YOU READ YOUR CAT?

### Cat Tail Speak

Cats scratch to leave their scent, to exercise and stretch their muscles and because it feels good to them.

How often should my cat go to the vet?

If your cat is healthy, at least once yearly for a check up and vaccinations. If your cat is older or sick, it may be recommended to be more often.

What is the youngest age a cat can start having kittens?

4-5 months old

Is it bad to have your male cat neutered?

No, it's good. This will help keep him at home, prevent fights with other cats, and prevent cancer in the future.

## ASK DR. JOYCE - ALL ABOUT CATS!

Should my female cat have a litter before we spay her?

No, letting a female cat have a litter before spaying her will increase the risk of her getting diseases caused by pregnancy, emergency surgery needed during labor, uterine infections, and cancer in the future. It is better to spay them before she has her first litter.

What are the most important things my cat should be protected against in Cayman and how do I protect them?

External parasites (fleas, ticks, mites), dog fights, feline leukemia, feline AIDS, feline rhinotracheitis, feline calici virus, panleukopenia, and heartworm disease. Many of these diseases are prevented by vaccinating your cat once yearly, giving them monthly parasite protection, and keeping them indoors or in a safe neighborhood.

How often should you trim a cat's nails?

Once monthly if your cat is kept indoors only. If you have an outdoor cat, they need their nails to climb trees and protect themselves against dogs, do not trim their nails.

How long do cats live for?

10-24 years in my experience

# ALL ABOUT DOGS.....

If you don't have the extra money to get your dog a microchip or a pet tag, you can go to the Department of Agriculture for a free dog license. The license tag has a unique number that can be used to find you if your pet is lost or picked up by an animal control officer.

**Do you have a dog that spends a lot of time tied up, in a small space or alone? Here are some tell tale signs that your dog is mentally and emotionally not happy.**

- constant barking
- pacing (walking back and forth constantly), or walking in circles
- continuous licking of one part of their body
- sleeping all or most of the day
- lots of tail chasing
- chewing objects

## TEACHING YOUR DOG TO SIT...

Take a yummy treat and hold it in front of your dog's nose. Move your hand slowly back towards your dog's rear end so his nose follows the treat.

Your dog will likely want to follow the treat backwards. The natural movement of his head going back should make him put his rear on the ground. As soon as he does that, give him the treat! (Tip: if he is having a hard time putting his rear down try doing it so he is against a wall and cannot back up far)

**A trained dog means a happy dog and family. To train your dog use treats and praise to show him the behaviours you want more of and ignore or re-direct the behaviours you don't like. DOGS DO WHAT WORKS!!!**

## Dogs and Heat Stroke

Body Temperature of 40-43C

Excessive, prolonged or recurrent panting.

Dark, red tongue and/or gums.

Sticky or dry tongue and/or gums; thick saliva; may froth at mouth.

Their heartbeat is much faster than normal.

Dog staggers while walking or appears disoriented.

Unwilling (or unable) to get up. Dog collapses and/or loses consciousness.

Their stomachs may get upset which can result in vomiting and diarrhea (may be bloody).

**Just as important as fresh water, your pets need to be able to access shade in the heat, and shelter from the rain. Make sure your pets are inside in the extreme heat or at least have access to a shaded area.**

## WHAT SHOULD YOU DO IF YOU SEE A DOG YOU DON'T KNOW RUNNING TOWARDS YOU?

**"BECOME A TREE AND PULL IN YOUR BRANCHES!"**

It is absolutely natural for a dog to want to chase something that is moving fast. If you run away from a dog chasing you they might think you are playing a game and run and jump on you. They have 4 legs, you only have 2 so they can run a lot faster! Dogs can also find direct eye contact very scary so it's best not to look in the dog's eyes. He will hopefully find you boring and move along to something else.

**Stop**

**Fold in your branches**

**Watch your roots grow and count in your head**

# CAN YOU HELP FIDO?

Fido's owner has never had a dog before and doesn't know about the 5 Freedoms. Help him make the right choices to give Fido the life he deserves!

Kevin just got a new dog Fido and he needs YOUR help! Choose the right path to a healthy and happy home.

## START

Kevin has breakfast, lunch and dinner everyday. Should Fido eat exactly what Kevin eats?

**NO**

Right! According to Dr. Joyce dogs need a well balanced dog food, dry or wet, made by reliable dog food companies.

**YES**

Not the best answer! Though dogs do enjoy some of the same foods we do, it is important they have a balanced diet.

Great Job!!! Dogs should either live with us in the house, or in a secured area with a dog house in the yard where they get time to play with us.

**NO**

Kevin is trying to decide where in his home Fido should live. His first thought is outdoor on a chain, is this right?

**YES**

Dogs are social and playful and don't deserve to spend their life on a chain. They aren't good guard dogs because they can't escape their chain. Often these dogs become scared and aggressive because they aren't allowed to live a normal life.

Yes, you are 100% right! Take a look below where Dr. Joyce explains why.

**YES**

Does Kevin need to take his dog to the vet at least once a year?

**NO**

Dogs need vaccines once a year to keep them safe and they can only get those at the vet.

Should Kevin train his dog by hitting and yelling at him?

**YES**

Wrong answer. You should never harm an animal, another person or yourself.

**NO**

Great choice! We are sure you don't like to be hit and our pets don't either. If you would like your pet to do something try using their food or treats to teach them.

**YES**

You got it! It is so important for your pet to have a pet tag or microchip so if they get lost the person who finds them knows where they belong.

Kevin heard that neutering his dog is a good thing. Is that true?

**NO**

Neutering (or spaying for female) is a very responsible thing to do. Try again!

**YES**

If Fido gets lost he would get home a lot quicker if he had a dog tag. Would you tell Kevin to get an identification tag with Fido's name and Kevin's number on it?

**NO**

Your pets should always have identification. Try again!

WONDERFUL WORK! Dr. Joyce says that neutering your dog is very good. It will keep him from running away from home, stop inappropriate urination and bad behaviour, prevent prostate and testicular cancer.

Congratulations! You have answered all the questions correct and have helped Kevin give Fido the best home he can

**END**

## ASK DR. JOYCE - ALL ABOUT DOGS!

**How long do dogs live for?**

About 10-18 years depending on the breed, size, and health of the dog.

**How do I get rid of ticks and fleas?**

There are many products like Frontline and Nexgard available at veterinary clinics in Cayman that dogs can take monthly to prevent fleas and ticks. Pest control and cleanliness in the environment, such as your yard, is also important to control ticks and fleas.

**What are the most important things my dog should be protected against in Cayman?**

Heat stroke, car accidents, heartworm disease, intestinal parasites (worms), external parasites (mites, ticks, fleas), parvo virus, hepatitis, and leptospirosis. These are all common and preventable diseases and can cause death of dogs in Cayman.

**Should my female dog have a litter before we spay her?**

No, letting a female dog have a litter before spaying her will increase the risk of her getting diseases caused by the pregnancy, emergency surgery needed during labor, uterine infections, and cancer in the future. Spaying her before her first litter is best.

**How often should my dog go to the vet?**

If your dog is healthy, at least once yearly for a check up and vaccinations. If your dog is older or sick, it may be recommended to be more often.

**What is heartworm?**

Heartworm disease is a parasite given to dogs when they are bitten by mosquitoes. The mosquitoes inject the heartworms into dogs, and if heartgard is not given monthly, the worms will grow in the heart and cause death in dogs.

## ALL ABOUT BIRDS!

Think about a bird in nature. How much do they fly in a day? A whole bunch! Imagine living in a box where you couldn't even take a step? A bird needs a cage big enough to stretch his wings and fly around. Even with a big cage, your bird would love some time to fly around the house and stretch their wings for some exercise. Caged birds are often so bored and lonely that they become aggressive and can start hurting themselves. They pull out their own feathers, injure their skin, bob their heads, pace back and forth, peck over and over again at cage bars, and shake or even collapse from anxiety. Make sure your bird has a nice environment to live in!

## ASK DR.JOYCE!

**Do Birds need to go to the vet?**

*Yes, at least once yearly.*

**What are some of the most common medical issues with birds in Cayman?**

*Attacked by cats or snakes, mites, bacterial infections, fungal infections, overgrown beaks or nails, broken bones, and cancer.*

**What are some of the most important things we need to know about our pet bird?**

*Birds are prey animals, which means they hide signs of sickness very well. You need to monitor them closely and bring them to the vet at any sign of sickness. Birds need to have very big and clean cages. They need a balanced diet with a lot of toys and enrichment in their cage.*

## THE BIRD FOOD GAME!

Put an X over the items that birds should NOT have...

Answer: All food items with a red border are poisonous to birds!

## ALL ABOUT HORSES

## ASK DR.JOYCE!

**Can horses go to the vet?**

Yes, in Cayman the vet will come to your horse.

**What do horses eat?**

A combination of grains, grasses, hay, treats, and supplements.

**What are some important things we need to know about horses?**

Horses are very sensitive animals. They need a proper diet, supplemented with vitamins if they don't have access to fresh grass. Horses do not have gall bladders (what helps us break down our food), so they need to eat multiple times per day, at least 3, to prevent stomach ulcers. Their feet need to be trimmed once every 6 weeks and their teeth need to be filed once yearly. Their field or stall needs to be cleaned regularly and it is very important that they have shade and clean water at all times. They need to be seen by a veterinarian at the first sign of sickness.

### Interesting facts about HORSES

They can sleep standing up!

They have the biggest eyes of most land mammals

They don't eat meat, they only eat plants which is called a herbivore.

They can run shortly after being born

### Meet Gerry the Gerbil!

Since Gerry is so small he is quite a bit more scared than a lot of other pets. He will need to get to know you before you go and just scoop him up! His life span is about 2-3 years, and has a diet of both plants and meat. Gerry would love to live in an aquarium with lots of places to burrow and hide. Gerry would love to have another male gerbil to live with, but it is best if they meet before they are 8 weeks old. He is an active little guy so nice tubes to jump through, a wheel to run on and ladders to climb would make this guy very happy!

**Meet Hammy the Hamster!** He and his friends are tiny little creatures that sleep all day and party at night. This is called being nocturnal. If you are a light sleeper a hamster may not be the right pet for you! Hamsters live for about 2-3 years and eat both plants and insects. They like to get exercise by running through tubes and on wheels, and burrowing in things like peat moss.

**Meet Ramona the Rat!** She is here to tell you that despite her and her friends sometimes bad reputation, she is actually very smart and a great companion. Rats need a lot of space in their environment and often do better with other rats to play with. They are clean and entertaining animals who bond very well with their humans. They have a life span of 2-3 years and eat both plants and meat. Rats need a lot of things to play with and a nice large clean home to live in!

**Meet Piggly and Wiggly, our two handsome Guinea Pigs!** Piggly and Wiggly are very friendly and love to be around each other. The best way to house guinea pigs to keep males with males and females with females. They get along best when they meet at a young age (before 6 weeks old). These guys will live between 5-7 years, and eat only grasses, vegetables and fruits. In your guinea pigs' house you should have some "hiding" boxes and plastic or cardboard tubes for them to run and play. Check your companion's nails often and call your vet if you notice a change in his behaviour!

### ALL ABOUT BUNNIES

### ASK DR. JOYCE - ALL ABOUT RABBITS!

**What are some of the most important things we should know about a rabbits health?**

*Rabbits are prey animals, which means they hide signs of sickness very well. Monitor your rabbit closely to make sure it is always eating, pooping, and comfortable. Make sure your rabbit sees a veterinarian once yearly to check it's ears, teeth, and overall health. Keep your rabbit in a shaded place where it can stay cool and safely away from predators. Make sure your rabbit has a very balanced diet.*

Rabbits can get bored just like you. Play with your rabbit and give her lots of attention. They should have at least 4 hours a day outside their hutch!

**I've heard rabbits need their teeth filed, is this true?**

*Yes, especially if they do not have a proper diet to help file them down. Rabbits have teeth that grow for their whole lives. They need to be examined by a veterinarian once yearly to see if any filing needs to be done. Some rabbits are born with worse teeth than others rabbits. If rabbits do not have dental care, they can grow too long and in the wrong direction, stopping the rabbit from being able to chew food and causing mouth sores. This can eventually lead to malnutrition and death.*

**What should rabbits eat?**

*A rabbit should have a well balanced diet made up of good quality pellets, fresh hay (timothy or other grass hays), oat hay, water, and fresh vegetables. Anything beyond that is considered a "treat", such as sugar or dairy filled candies sold at pet stores, and should be given in only small amounts. Please talk to your veterinarian about your rabbit's diet in detail.*

THIS ISSUE'S  
**KIDSCARE  
HEROES!**

Rhiannon Bilchuris is a truly outstanding kid. With a real passion for animals she attends not only after school programs with kidsCARE, showing off her dog Jackie Chan (who her family adopted from CARE), but she also attends the free vet clinics CARE runs through their grassroots program. Making sure all the pets waiting are happy, have water, and even grooming them with her own play vet set this little lady is a true inspiration to others. Thank you for always being willing to help, and spreading awareness. You Rock!

Aaliyannah Anderson, Danae Wilson, Kayleigh Push, Analeah Parker, Durean Thompson, Elizabeth Walton-Pineda and their teacher Miss Nesa Pena.

This group of Year 6 students of Savannah Primary School were part of an Awareness Exhibition held at their school hall this year. In attendance were students and teachers from John A Cumber Primary School, Prospect Primary School, MLAs from the district of Bodden Town, representatives from the Ministry & Department of Education, parents and family members. The central idea involved students exploring how their passion can drive them towards great accomplishment. This group from Savannah Primary School chose 'Animal Homelessness' and reached out to the kidsCARE team to provide them with some information on the subject. With the assistance and guidance of their teacher Miss Nesa Pena, the students worked collaboratively and collectively towards gathering information and performing an action geared towards changes with positive impact on all. Well done students, you are helping to create a better future through awareness.

Jayden Goddard celebrated his 9th birthday this year and for his party, in lieu of presents, Jayden asked for money to be donated to CARE. He collected a whopping \$200 for CARE!!!! Well done Jayden, way to go on being such a generous, thoughtful, kind and caring young man.

# MEET NIKO, OUR TRIPAWED PET HERO!

**NIKO IS A SWEET GUY, WHO WAS IN A TREMENDOUS AMOUNT OF PAIN AND DESPERATELY NEEDED OUR HELP. THIS HANDSOME CHAP SUSTAINED AN AWFUL INJURY TO HIS FRONT RIGHT LEG AND NEEDED IT TO BE REMOVED. AT THE SAME TIME HE WAS ALSO SUFFERING FROM HEARTWORM DISEASE AND AN OWNER WHO DID NOT WISH TO KEEP HIM ANYMORE.**

**NIKO IS A TRUE "ISLAND BOY", GRATEFUL FOR A BED, SOME FOOD AND A LITTLE LOVING. WHEN WE FIRST MET NIKO HE WAS VERY SCARED, YET SO VERY GENTLE WITH PEOPLE, EVEN WITH THE PAIN HE WAS IN. NIKO'S LUCK WAS TO TURN AROUND, AS AFTER DR JOYCE FROM ISLAND VET PERFORMED THE SURGERY TO REMOVE HIS LEG, SHE ALSO KINDLY TOOK NIKO HOME TO FOSTER AFTER THE OPERATION WHERE HE WAS ABLE TO REST AND RECOVER.**

**NIKO DID SO WELL AFTER HIS SURGERY THAT HE WAS ABLE TO QUICKLY MOVE ONTO ANOTHER WONDERFUL FOSTER FAMILY WHO WAS TO HELP HIM THROUGH HIS HEARTWORM TREATMENT. NIKO PROVED A WONDERFUL FAMILY DOG, GETTING ALONG WELL WITH OTHER DOGS AND THE FAMILY'S TWO CHILDREN.**

**WE ARE VERY HAPPY TO SAY THAT NIKO IS NOW HEARTWORM FREE, LIVING LIFE TO THE FULL ON 3 LEGS, HAS BEEN ADOPTED BY A WONDERFUL FAMILY AND HAS A FUR-BROTHER EUGENE, WHOM HE JUST ADORES.**

## **RESPECT AND COMPASSION FOR OTHERS**

As part of being responsible, show respect and concern for the well-being of animals and other people. Respect ranges from using basic manners to having compassion for the suffering of others. If you see an animal being hurt, remember that you can help.

Speak up!

**Cruelty  
Contacts**

**Department of  
Agriculture**

**(345) 947-3090**

**Cayman Islands  
Humane Society**

**(345) 949-1461**

## HOW CAN YOU BECOME OUR NEXT KIDSCARE HERO?

Being kind to animals is cool and we want to hear about what you have been doing to better the lives of animals around you.

This could be doing something like this issue's kidsCARE heroes did, holding a fund raiser to raise money for an animal charity, educating your friends and family about animal welfare or anything else you can think of!

If you think you have what it takes please send a short write up to [kids@caymancare.ky](mailto:kids@caymancare.ky) about what you did and/or are doing to better the community for animals around you. We would love to see some pictures as well. Once we have all the nominations we will publish the new hero in our next issue!

### SOME IDEAS OF WHAT

### YOU CAN DO

- Be kind to animals
- Tell someone if you see an animal not being treated right
- Make sure your animals have all the 5 freedoms
- Hold a fund raiser to raise funds and awareness for animals
- Get crafty and make homemade pet toys

**THE POSSIBILITIES ARE ENDLESS!**

**A BIG THANK YOU ONCE AGAIN TO DR. JOYCE AND ISLAND VETERINARY SERVICES FOR PROVIDING ALL THE MEDICAL INFORMATION TO MAKE THIS ISSUE POSSIBLE!**

**THANK YOU TO THIS ISSUE'S SPONSOR:**

# Ogier

**INTERESTED IN LEARNING MORE ABOUT C.A.R.E., KIDSCARE OR BECOMING A SPONSOR?
